

THE HOUSING INDICATOR TOOL 5.0

THE HOUSING INDICATOR TOOL

- **Accountability Tool:**
tracks region's progress toward housing production and preservation goals
- **Housing Policy Toolkit:**
outlines the policies being deployed in each jurisdiction
- **Calls to Action:**
encourages every sector to get involved
- **Equity Focused:**
links racial equity and housing

WHERE IT BEGAN

RESEARCH REPORT

Meeting the Washington Region's Future Housing Needs

A Framework for Regional Deliberations

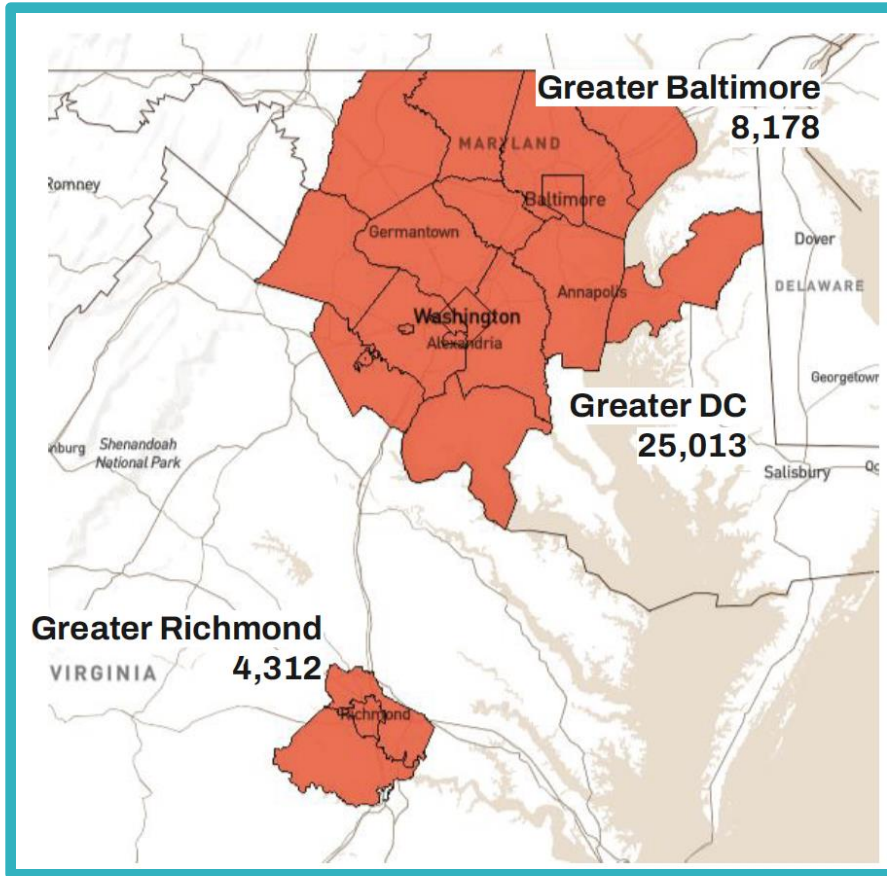

Metropolitan Washington
Council of Governments

Needed between 2015 and 2030 in Metropolitan Washington:

374,000
net new housing units

77%
affordable

WHERE WE ARE NOW

**Net new housing units
needed annually**

- **Expanded Reach:**
 - *Greater DC*
 - *Greater Baltimore*
 - *Greater Richmond*
- **Granular Goals:**
 - *Annual*
 - *Regional*
 - *Jurisdictional*

LEVERAGING THE HIT

Understand

- *How is my jurisdiction doing on housing production and preservation?*

Advocate

- *Which policies is my jurisdiction missing?*

COMPONENTS OF THE HIT

Landing Page

The screenshot shows the landing page of the HAND Housing Indicator Tool. At the top, there is a navigation bar with the logo, a "SELECT A JURISDICTION" dropdown, and links for "About HAND", "Resources", and "Calls to Action". Social media icons for Facebook, Twitter, and LinkedIn are also present. The main content area features a large, stylized red line-art map of the Washington D.C. area on the right. On the left, the text reads: "How Do We Remove The Barriers To Accessing **Quality, Safe, Affordable Housing In Our Region?**" followed by a paragraph explaining the HIT's purpose. Below this, there are three buttons: "Greater Baltimore Dashboard", "Greater DC Dashboard", and "Greater Richmond Dashboard". At the bottom, a link says "Discover the complex history of US housing and learn what we can do about it" with a downward arrow.

How Do We Remove The Barriers To Accessing
Quality, Safe, Affordable Housing In Our Region?

The HIT is a platform that tracks local jurisdictions' housing production and preservation in the Capital Region to help stakeholders create paths for removing obstacles to opportunity and supporting housing stability.

[Discover the complex history of US housing and learn what we can do about it](#) ▼

Regional Dashboards

The screenshot shows the "Greater DC" dashboard within the HAND Housing Indicator Tool. The navigation bar is similar to the landing page but includes a dropdown menu currently set to "Greater DC". Below the navigation bar, there is a "[Home]" link. The main heading is "Greater DC". Underneath, a "Fast Facts:" section is followed by a bulleted list of key statistics and information about the Greater DC region. At the bottom, there are two buttons: "Print Page" and "Share by Email". The same stylized red line-art map of the Washington D.C. area is visible on the right side of the dashboard.

Greater DC

Fast Facts:

- The Greater DC region was home to 5,674,126 people and had 2,281,938 housing units in 2022. Since 2010, Greater DC has added an average of 51,200 people and 22,200 housing units per year.
- Thirty-eight percent of households were renters and 47% percent of renters had unaffordable housing costs.
- Greater DC did not meet the annual production target of 25,013 units, with 21,325 new units built in 2023. Cumulatively, Greater DC has produced at least 108,765 units since 2019, short of its 5-year target of 125,065.
- Greater DC includes the District of Columbia; Charles, Frederick, Montgomery, and Prince George's counties and the cities of Gaithersburg and Rockville in Maryland; Arlington, Fairfax, Loudoun, and Prince William counties and the cities of Fairfax, Falls Church, Manassas, and Manassas Park in Virginia. All jurisdictions except Manassas Park share data for the HIT.

COMPONENTS OF THE HIT

Arlington County

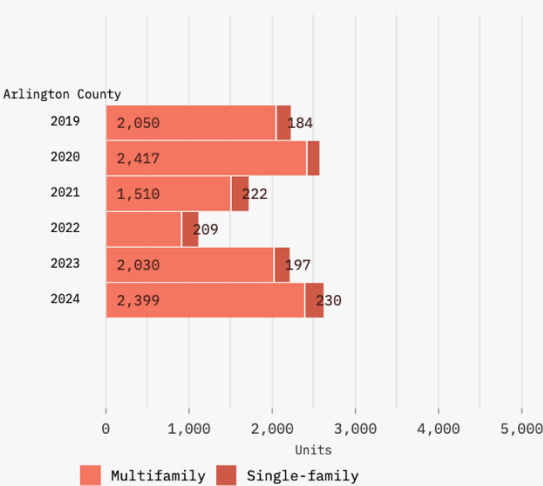

Fast Facts:

- Arlington County was home to 234,162 people and had 123,963 housing units in 2023. Since 2010, Arlington has added an average of 2,000 people and 1,400 housing units per year.
- Fifty-eight percent of households were renters and 40 percent of renters had unaffordable housing costs.
- Arlington exceeded the annual production target of 1,393 units, with 2,629 new units built in 2024. Cumulatively, Arlington has produced at least 12,525 units since 2019, exceeding its 6-year target of 8,358.
- Arlington has not adopted the 2030 COG housing targets but has established a local goal for 17.7% of rental housing stock to be affordable at 60% of AMI or less and 28.4% of new ownership stock to be affordable between 80-120% of AMI by 2040.

COMPONENTS OF THE HIT

Who Can Afford to Live in the Region?

COMPONENTS OF THE HIT

Calls to Action for ALL Sectors:

- *Public Sector*
- *Private Sector*
- *Nonprofit Organizations & Institutions*
- *Real Estate Developers*
- *Philanthropy*
- *Community Members & Organizers*
- *Law Firms & Lawyers*
- *Lenders & Financiers*

Public Sector

1. Create a local housing trust fund to provide flexible funding, and ensure that it has a dedicated funding source:

Localities across the country use housing trust funds to provide desperately needed flexible financing for affordable housing development. Many jurisdictions in the HIT have a trust fund, but not all have a dedicated funding source. Trust funds should be tied to a reliable funding source (like the baseline of the local budget) so that they're revolving and not vulnerable to shifts in political priorities. What changes can you make in your jurisdiction?

2. Amend zoning regulations to provide for more housing density in traditionally lower-density neighborhoods and near transit:

Pushing for zoning changes is a high impact way to support increasing the housing supply in your jurisdiction and is a racial equity issue. Consider your jurisdiction's progress on the three zoning-related policies on the HIT and push to allow for more density, especially in high-resource neighborhoods and near transit.

3. Leverage public land for affordable housing development

Land cost can be a significant part of development costs, particularly in high-cost areas of our region. Seek out opportunities to leverage public land in your jurisdiction to be used for affordable housing development.

EVOLUTION OF THE HIT

HIT 1.0

- DC Metro Region
- Policy status for each jurisdiction
- Housing outcomes by income range

HIT 2.0

- New questions on production & preservation trends
- Increased racial equity focus
- Additional policy clarity

HIT 3.0

- Enviro justice indicators
- Deeper dive on home-ownership
- Introducing Baltimore jurisdictions

HIT 4.0

- Regional dashboards
- Potential homebuyers by race
- Introducing Richmond jurisdictions

NEW TO HIT 5.0

New Zoning Policies

Additional Richmond Data

▼ Maximize transit-oriented development

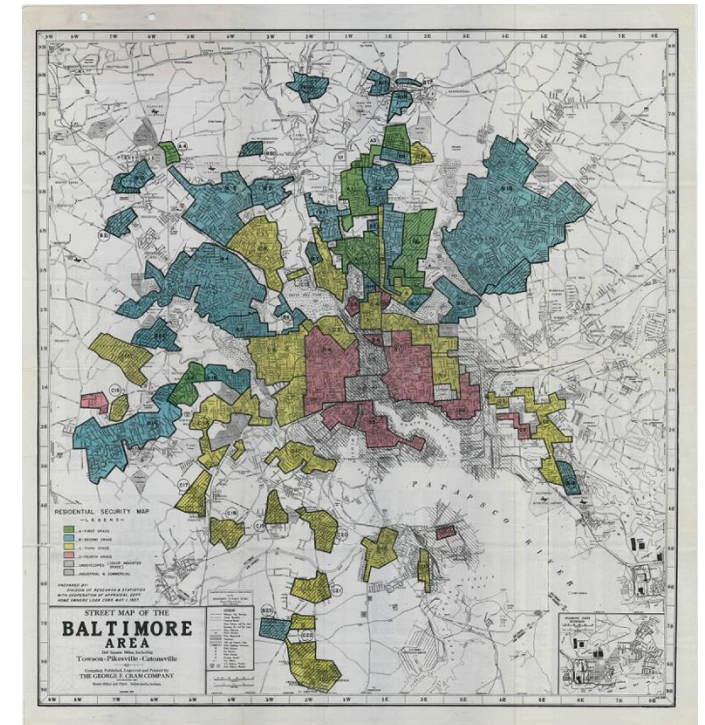

Dense residential development around transit stations increases the number of residents who can access jobs and amenities (e.g., groceries, restaurants, and childcare) without increasing traffic congestion as much as development in other areas. Clustering housing around transit also reduces development expenses while improving transit investment ridership and returns. Jurisdictions that allow multifamily developments on more than half of residential land near high-capacity transit are maximizing transit-oriented development.

▼ Zoning promotes housing variety

Residential zoning that allows for a wide range of housing types ensures people of various ages, incomes, and cultural preferences can live in a jurisdiction. Promoting variety means jurisdictions have zoning that allows for duplexes, quadplexes, middle-density multiplexes, and larger multifamily developments on at least 25 percent of residential land. This flexibility enables developers to produce more housing with the same fixed costs, increasing the affordability and variety of new units.

▼ Facilitates multifamily development

Special exception and discretionary review processes—which may require developers to undertake additional negotiations, professional certifications, and public hearings outside of what is written in the zoning code—increase review time, costs, and risk in housing development. Clear, by-right zoning standards that enable a multifamily development to pass through standard administrative review in a timely manner makes for more affordable housing. Jurisdictions are doing more to facilitate multifamily development when at least half of projects proceed by-right.

2024 Results from the HIT Survey

HIT 5.0 Launch

Leah Hendey

Overall housing production increased from 2023-2024

Total New Housing Units Produced, 2019-2024

Note: City of Baltimore did not report total units in 2023.
Source: HIT Survey of Local Jurisdictions

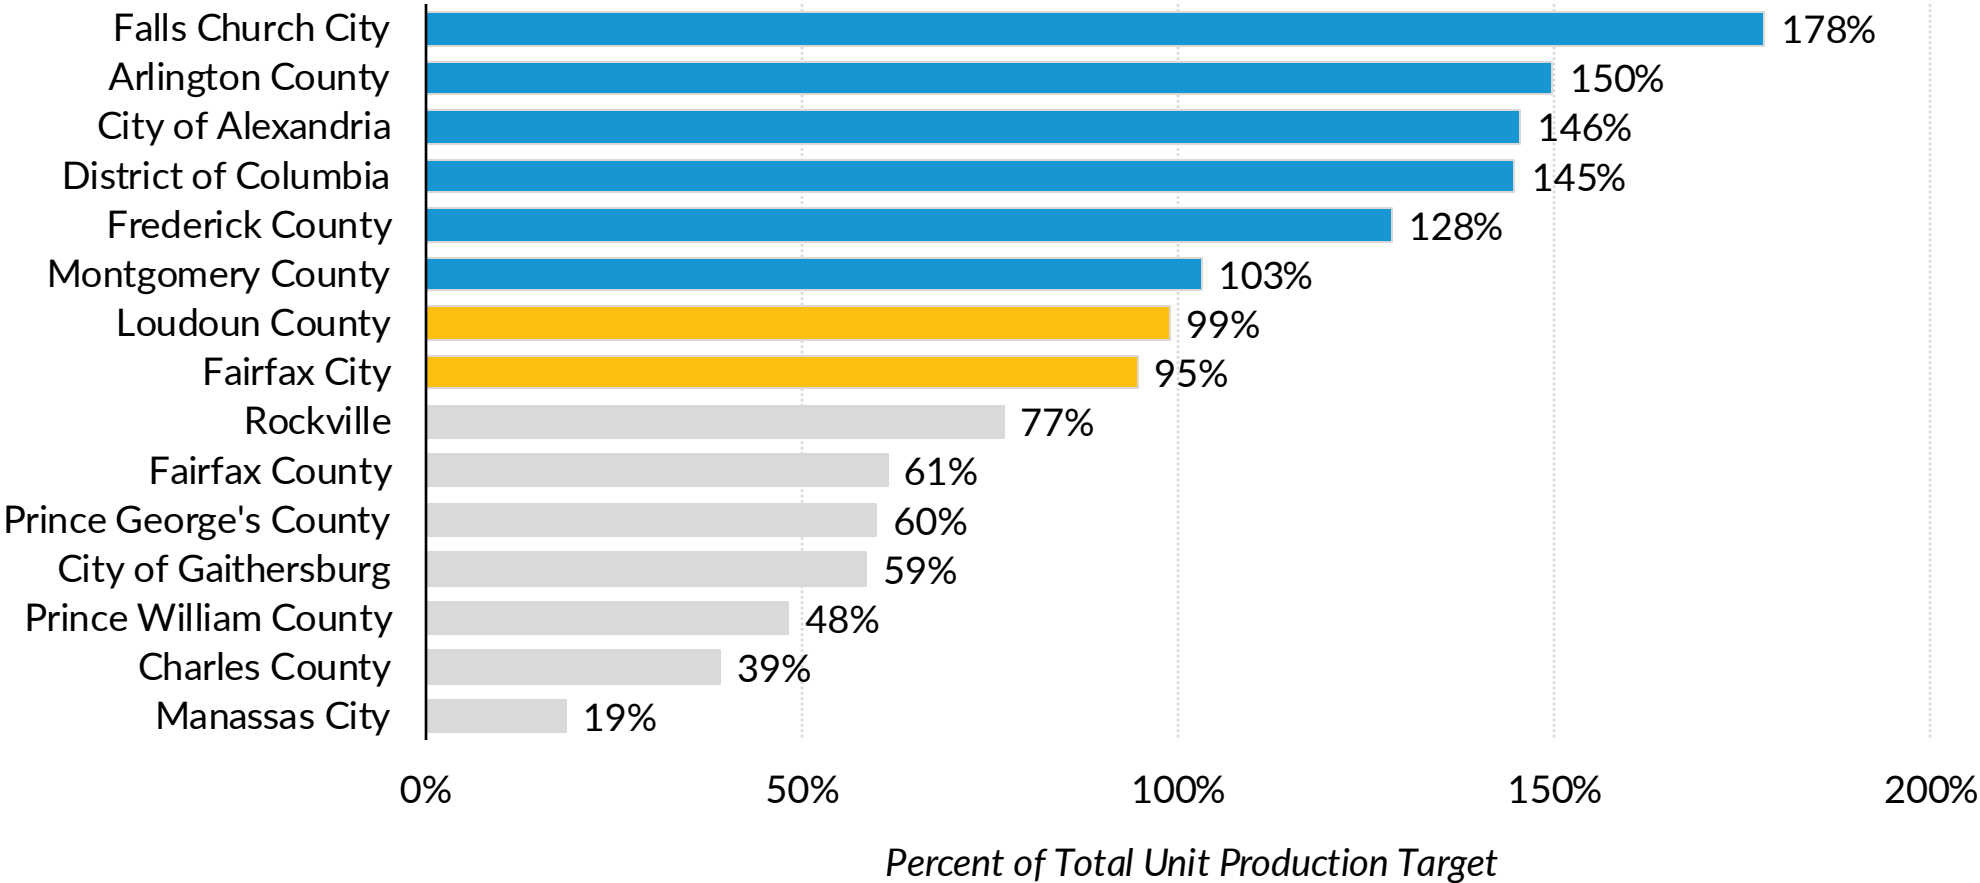

10 jurisdictions produced at least 85% of annual unit goal

New Units as a Percent of Estimated Annual Unit Goal by Jurisdiction, 2024

6 jurisdictions exceeded 6-yr production targets, with 2 very close

Total Housing Units Produced as a Percent of Target, Greater DC Area, 2019-24

Note: Targets are calculated for the number of years jurisdictions participated in the HIT.
Source: HIT Survey of Local Jurisdictions

Most jurisdictions have fewer housing units in the pipeline

Percent Change in Number of Housing Units Permitted for New Construction, 2022 to 2024

Note: Only includes jurisdictions reporting in both years.
Excludes the smaller cities that participate in the HIT.
Source: HIT Survey of Local Jurisdictions

More than 5,400 affordable units added across the Capital region

Number of New Committed Affordable Units Built by Affordability Level, 2024

Note: 181 units in the Greater DC area and 19 units in the Greater Baltimore area were set aside for permanent supportive housing.
Source: HIT Survey of Local Jurisdictions

Greater DC produced 18,064 new committed affordable units in the last 6 years

New Committed Affordable Units by Affordability Level, Greater DC Area, 2019-24

Note: 175 committed affordable units in 2019 have unknown affordability levels.

Source: HIT Survey of Local Jurisdictions

More than 33,000 affordable units are in the pipeline or under construction

Number of Affordable Units Under Construction or in the Pipeline, 2024

Source: HIT Survey of Local Jurisdictions
Note: Charles County, Fairfax City, and Annapolis also have a combined 201 units in the pipeline or under construction.

More than 5,400 units were reported as preserved in 2024, with more jurisdictions reporting

Number of Affordable Units that were Preserved by Type, 2024

Meeting the region's housing needs requires policies to preserve, produce, and protect

Category	Policy	All (N=21)
Preserve	Homebuyer assistance	20
Produce	Inclusionary housing	19
Protect	Locally-funded emergency rental assistance	15
Protect	Climate Action Plan	15
Preserve	Right of First Refusal	14
Produce	Prioritize Public Land	14
Protect	Outreach on Flood Insurance	13
Produce	Housing Trust Fund (Dedicated Source)	10
Protect	Locally-funded Vouchers	8

12 jurisdictions have zoning that allows housing variety

Share of Residential Land Zoned for Only Single-Family Housing

6 jurisdictions allow denser multifamily development in a larger area

Share of Residential Land Zoned for 10+ Units

6 jurisdictions are doing more to facilitate multifamily development

Share of Multifamily Development Applications over the Past 3 Years that Included a Special Exception or Discretionary Review Process

6 jurisdictions are maximizing transit-oriented development

Share of Land within a ½ Mile of High-Capacity Transit that Permits the Development of Multifamily Housing

Outcomes are important, a lot of multifamily housing still being produced

Percent of New Units by Type, All HIT Data Collection

Note: Includes all years of HIT data collection for each jurisdiction, typically 6 in the Greater DC area and 3 in the Greater Baltimore area.
